OUR CORE BUSINESS & STRATEGY

.....

Design, installation and maintenance for different kinds of electrical systems:

- Electrical railway/tramway/trolley lines
- Control command signalling
- Telecommunications
- Electrical substations
- Electricity transformation

SOME PICTURES OF OUR WORKS

THE MAIN PROBLEMS WE ARE FACING

-
- **Political issues:** Frequent changes in Italian governments don't allow small firms to take risks and make big investments, slowing down innovation in the sector.
 - **Supply chain issues:** Russia-Ukraine situation and bad political decisions have led to a lack of supplying and a lot of speculation on goods prices.
 - **Specialized personnel:** In our sector it is pretty difficult to find specialized personnel. We usually hire employees and give them education to learn some skills for specific works.

OUR STRENGTHS

-
- **Lean organization** thank's to our small size
 - We are in the most important registers of Italian Railways organization certifying **the highest standards in the field**
 - **40 Years of experience** with high professional employees
 - High quality **machinery** and railways' means

Our latest investment was exposed at INNOTRANS 2022 in Berlin
